4 PATTERN STATIC LOGO PROJECTORS

INSTALLATION MANUAL

IMPORTANT NOTES BEFORE USE

To ensure a sharp and clear projection, follow these steps to adjust the focus:

- The product uses a zoom imaging system.
- After receiving the projector, adjust the focus as needed.
- Turn the lens at the front of the projector (a label on the lens indicates adjustment).
- Rotate the lens outward or inward until the logo projection is sharp.

Important:

- For shorter projection distances, rotate the lens outward.
- For longer projection distances, rotate the lens inward.

Adjust The Logo To Spin or Static

There is a switch at the rear of the lamp .Press the switch to spin or static.

Remote control function also available, it can control the logo to spin or static, and turn on and off the projector light.

PROJECTOR INSTALLATION

PREPARATION

1. Drill screw holes in the positions to be installed
Dia. 10mm x Depth 40mm
2. Put the explosion screw into the punched hole first
3. Align the screw hole of the machine base bracket into the threaded end of explosion screw.

INSTALLATION

Screw the nut into the thread at the end of the explosion screw until it is tightened and the installation is completed.

REPLACING GOBO METHOD

STEP 1

Screw out all the screws of the front cover of the projectors.

STEP 2

Take out the spring on the GOBO and then take out all the GOBOS. Or only the GOBOS you want to change.

Note: a little soft glue will be applied to install the gobo that you received, and no glue is needed when replave or reinstall gobo. only the spring is needed to clamp the gobo.

STEP 3

- Take the gobo out and replace with new gobo
- Make sure the new gobo are clean from dust and other particles
- Insert the new gobo, Ensuring the "REVERSE SIDE" is facing up.
- Secure it with the snap ring.

STEP 2

Take out the spring on the GOBO and then take out the GOBO

Note: a little soft glue will be applied to install the gobo that you received, and no glue is needed when replave or reinstall gobo. only the spring is needed to clamp the gobo.

BLACK COLOR IN CUSTOM GOBO ART: RULES, EXAMPLES, AND DESIGN TIPS

Black behaves differently than other colors—it blocks light, causing it to not project. This guide will explain when black works, when it doesn't, how to handle black in logos, and tips for designing gobos that project clearly and beautifully.
