## EXPERIENCE THE FUTURE OF INTERACTIVE PROJECTION

### Infinity Projectors IP-AIO3200/4000/4500 Series

Dive into the innovative world of interactive projection. These all-in-one projectors are not just tools; they are gateways to creating immersive, engaging environments and a good time for any crowd. Equipped with over **45 interactive games** and an advanced infrared capture camera, these projectors are perfect for transforming any indoor space. Whether it's in educational settings, bringing lessons to life, retail spaces, creating dynamic product displays, or corporate environments, adding an interactive edge to presentations, the IP-AIO3200/4000/4500 series stands as a versatile solution.

## CAMERA VS RADAR SENSOR

**CAMERA SENSORS** use visual tracking to detect movement and interaction on surfaces. They're ideal for well-lit indoor environments and deliver solid performance for basic educational and presentation uses. They're a cost-effective solution for standard interactive needs.

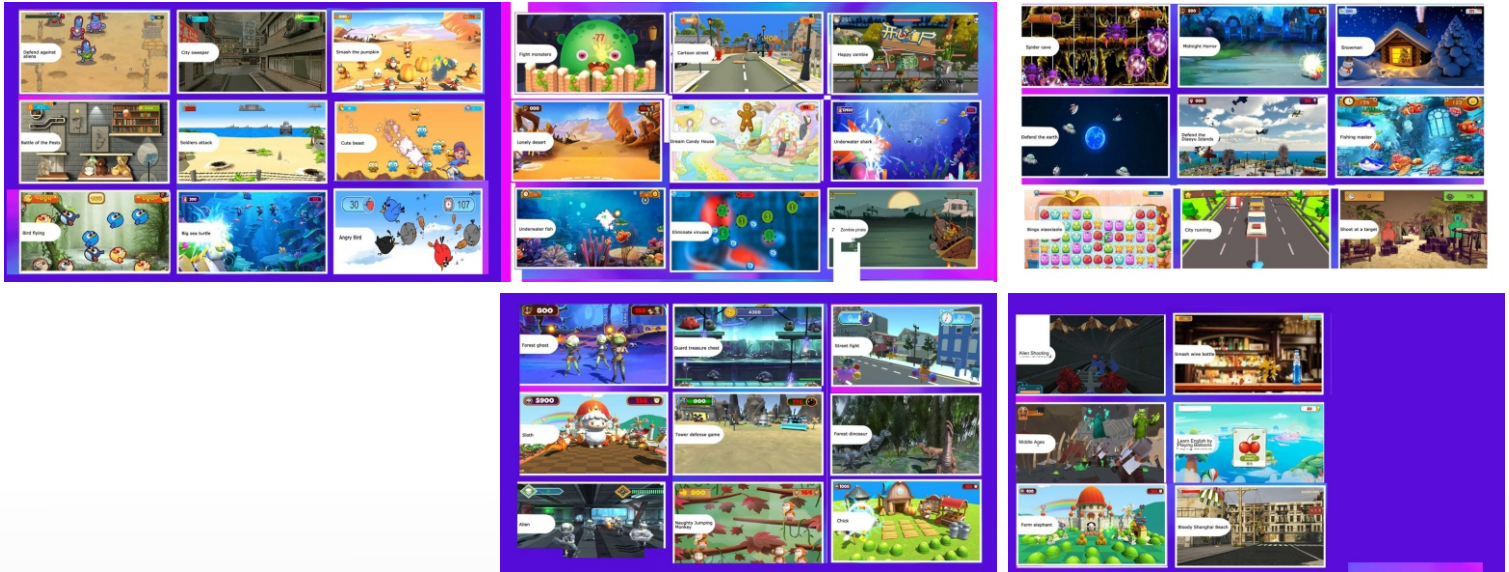

**RADAR SENSORS** on the other hand, offer a next-level experience. These sensors use advanced motion detection that works in any lighting condition, with higher precision and faster response times. Perfect for classrooms, museums, retail displays, and high-traffic environments, radar sensors provide enhanced accuracy, smooth interaction, and more reliable performance — even in challenging conditions.
