INFINITY CUSTOM INDOOR LOGO PROJECTORS

INSTALLATION MANUAL

1. FOCUSING THE PROJECTION

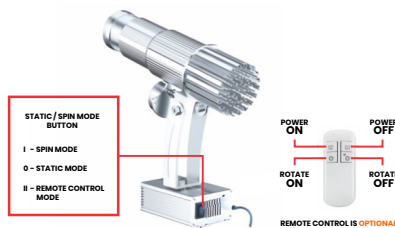

Before receiving the goods for use, the definition must be adjusted.
(Clarity should be adjusted) for the entire front lens.

Grasp the middle of the lens with your hands and slowly twist it out for adjustment.
Adjust until the logo is clear.

Note: The closer the projection is, the more the lens needs to be twisted out. For example, project 3m, the lens screw needs to be twisted out about 2cm to be clear.

2. ADJUST SPIN OR STATIC MODE

Change the switch position on the back of the projector stand according to the projector function required.

STATIC / SPIN MODE BUTTON

- I - SPIN MODE
- 0 - STATIC MODE
- II - REMOTE CONTROL MODE

3. REPLACING THE GOBO

Detach the center section of the Projector by turning it counterclockwise to open the gobo holder.

Change the gobo:

- Remove the steel wire snap ring
- Note:** a little soft glue are applied on the default gobo, make sure it clean up from snap ring after remove it
- Take the gobo out and replacee with new gobo
- Make sure the new gobo are clean from dust and other particles
- Insert the new gobo, Ensuring the "REVERSE SIDE" is facing up.
- Secure it with the snap ring.
- Reattach the middle part of the projector
- REPLACEMENT COMPLETE! Enjoy Your New Projector

BLACK COLOR IN CUSTOM GOBO ART: RULES, EXAMPLES, AND DESIGN TIPS

Black behaves differently than other colors—it blocks light, causing it to not project. This guide will explain when black works, when it doesn't, how to handle black in logos, and tips for designing gobos that project clearly and beautifully.
